### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: the allowed claim requires analyzing two specific polymorphisms, one in the connexin 37 gene (connexin), and the other in the NADH/NADPH oxidase p22 phox gene (phox), and assessing a genetic risk of myocardial infarction based on the analysis. As pointed out in the response filed 09/03/08, neither Boerma et al. nor Inoue et al. (1998) establish a direct correlation between the connexin and phox genes, respectively, and myocardial infarction. While the conditions investigated in the references, atherosclerosis and coronary artery disease, respectively, were certainly known in the art to be related to myocardial infarction, any connection between the connexin and phox gene polymorphisms described in the references and myocardial infarction would have merely been viewed as possible or speculative. At best, the skilled artisan considering Boerma et al. and Inoue et al. would have been invited to carry out unpredictable experimentation to determine if in fact any definitive correlation existed between the combination of said polymorphisms and myocardial infarction. Such unpredictable experimentation was undertaken by Applicants, as described in the instant specification, providing for a specific assessment of genetic risk of myocardial infarction based on detection of the two noted gene polymorphisms.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 1637

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
